Quantum Retail Analytics Case Study

Customer Analytics • Trial Assessment • Recommendations

EXECUTIVE SUMMARY

The chips category can be grown by targeting **Mainstream Young Singles/Couples** and expanding successful trial store layouts.

Our Analysis identified a high-value customer segment with strong preference for premium brands and larger pack sizes. In addition, trial store layouts delivered significant increases in sales and customer traffic.

CUSTOMER OPPORTUNITY

Mainstream Young Singles/Couples represent the highest-value growth segment

One of the largest contributors to category sales

Largest customer segment in the chips category

Pay significantly more per unit than comparable customer groups

BUSINESS IMPACT

Higher revenue potential and lower price sensitivity.

PRODUCT OPPORTUNITY

Premium brands and larger pack size drive stronger engagement.

Preferred Brands

Preferred Pack Sizes

BUSINESS IMPACT

Targeted merchandising and promotions can increase category value.

TRIAL SUCCESS

All three trial stores outperformed their matched control stores during the trial period.

77

Store 77

Significant uplift in sales and customer traffic

86

Store 86

Attracted significantly more customers

88

Store 88

Increased both customer traffic and purchasing frequency

BUSINESS IMPACT

Trial layouts demonstrate strong potential for broader rollout.

Recommended Strategic Actions

Focus marketing and promotions on Mainstream Young Single/Couples

Increase visibility of premium brands in-store and online

Promote larger sharing pack sizes (270g, 330g, 380g)

Expand successful trial layouts to additional stores

BUSINESS CHALLENGE AND ANALYTICAL APPROACH

Identifying category growth opportunities through customer analytics and store experimentation

 BUSINESS QUESTION

How can the chips category be grown over the next six months?

KEY DELIVERABLES

 **CUSTOMER INSIGHTS**
Identify who drives category growth.

 **PRODUCT INSIGHTS**
Understand preferred brands and pack sizes.

 **STORE INSIGHTS**
Measure impact of store layout changes.

 KEY TAKEAWAY

By combining **customer analytics** with controlled **store experimentation**, we identified **actionable opportunities** to increase category sales and customer engagement.

SALES PERFORMANCE BY CUSTOMER SEGMENT

Three customer segments account for the largest share of chip sales

Total sales vary across customer segments. Budgets Older Families lead in sales, followed by Mainstream Young Singles/Couples and Mainstream Retirees.

KEY INSIGHTS

Budget Older Families

- Highest total sales contribution
- Driven by high purchase volume per customer

Mainstream Young Singles/Couples

- Second highest sales contribution
- Largest customer population in the category

Mainstream Retirees

- Third highest sales contribution
- Consistent purchasing behaviour

TOP 3 SEGMENTS AT A GLANCE

Budget Older Families
157K
Total Sales (AUD)

Mainstream Young Singles/Couples
147K
Total Sales (AUD)

Mainstream Retirees
145K
Total Sales (AUD)

WHY THIS MATTERS

Focusing on segments that drive the most sales allows us to prioritise efforts where they can have the greatest impact on category growth. >>

TAKEAWAY

These three segments collectively represent the largest revenue opportunity and warrant further investigation into their purchasing behaviour and product preferences.

WHY THIS SEGMENT MATTERS

Mainstream Young Singles/Couples pay significantly more per unit than other customer segments.

While Budget Older Families currently generate the highest sales, mainstream Young Singles/Couples demonstrate a greater willingness to purchase higher-priced products, making them a more attractive segment for future category growth.

AVERAGE PRICE PER UNIT BY CUSTOMER SEGMENT

T-TEST RESULTS

	Average Price Per Unit (AUD)	
	Mainstream Young Singles/Couple	\$4.04
	All Other Segments (Average)	\$3.71
	Difference	+9%
	p-value	<0.001

KEY FINDING
The difference in average price per unit is statistically significant. This indicates that Mainstream Young Singles/Couples are willing to pay more for chips products than other customer groups.

WHY THIS MATTERS

Higher Price Acceptance	Increased Revenue Potential	Strategic Advantage
This segment is less price-sensitive and more receptive to premium products.	Even small increases in product value or premium product sales can generate meaningful category growth.	Marketing investment targeted at this segment is more likely to generate higher returns than broadbased promotions.

KEY TAKEAWAY

Mainstream Young Singles/Couples represent a high-value customer segment that combines scale with a willingness to purchase premium products.

PRODUCT PREFERENCES

Mainstream Young Singles/Couples demonstrate a strong preference for premium chip brands

Brand affinity analysis reveals that Mainstream Young singles/Couples are significantly more likely than other customer groups to purchase premium and higher-value chips brands.

BRAND AFFINITY ANALYSIS

KEY FINDINGS

Premium Brands Over-Index

Mainstream Young Singles/Couples are:
24% more likely to purchase Tyrrells
23% more likely to purchase Twisties
20% more likely to purchase Kettle
20% more likely to purchase Tostitos
compared with other customers.

Higher Value Purchases

This segment shows a clear preference for premium and high-value chip brands over other alternatives.

Commercial Opportunity

Focusing on these brands is likely to better resonate with this high-value segment and drive stronger category outcomes.

TOP PREMIUM BRANDS PREFERRED

Tyrrells

Tostitos

WHY THIS MATTERS

These premium brands align strongly with the purchasing preferences of the highest-value segment, enabling retailers to maximise category value and customer satisfaction.

RECOMMENDATION

Increase shelf visibility, promotional activity and targeted marketing support for these premium chip brands preferred by Mainstream Young Singles/Couples.

PACK SIZE PREFERENCES

Mainstream Young Singles/Couples show a strong preference for larger pack sizes

Pack size affinity analysis reveals that Mainstream Young singles/Couples are significantly more likely to purchase larger sharing packs compared with other customers.

PACK SIZE AFFINITY ANALYSIS

Affinity index (vs All Other Customers)

1.00 = Average (No Difference) | >1/00 = More likely to purchase

KEY FINDINGS

Larger Packs Over-Index

Mainstream Young Singles/Couples are:
27% more likely to purchase 270g packs
26% more likely to purchase 380g packs
22% more likely to purchase 330g packs compared with other customers.

Higher Basket Value

Larger pack purchases contribute to higher transaction values and category revenue.

Commercial Opportunity

Optimising shelf placement and promotions around larger sharing packs can increase category sales.

TOP PREMIUM BRANDS PREFERRED

270g

1.27

Affinity Index

380g

1.26

Affinity Index

330g

1.22

Affinity Index

WHY THIS MATTERS

Larger pack sizes generate greater revenue per transaction and align closely with the purchasing preferences of the highest-value customer segment.

RECOMMENDATION

Increase visibility and promotional support for larger pack sizes, particularly 270g, 330g, and 380g products.

STRATEGIC CUSTOMER INSIGHTS

Customer Analytics identified a clear growth opportunity within the chips category.

Analysis of purchasing behaviour revealed that Mainstream Young Singles/Couples represent the most attractive growth segment due to their large customer base, higher willingness to pay, preference for premium brands, and affinity for larger pack sizes.

CUSTOMER SEGMENT

Mainstream Young Singles/Couples

One of the largest customer groups and a major contributor to category sales.

Top Performing segment across sales and growth.

HIGHER SPENDING BEHAVIOUR

Pay approximately

9% more per unit
than other customer segments.

Statistically significant difference.

PREMIUM BRAND PREFERENCE

Strong affinity for:

- Tyrrells
- Twisties
- Kettle
- Tostitos
- OLD
- Pringles
- Doritos

These premium brands over-index vs. other customer segments.

LARGER PACK PREFERENCE

Higher Likelihood of purchasing:

270g packs
330g packs
380g packs

Aligns with their sharing occasions and higher spending behaviour.

STRATEGIC IMPLICATIONS

Prioritise the Right Segment

Prioritise Mainstream Young Singles/Couples in marketing campaigns and customer engagement initiatives.

Focus on Premium Brands

Increase visibility and promotional support for the premium brands preferred by this high-value customer segment.

Promote Larger Pack Sizes

Promote larger sharing packs through optimised shelf placement, bundles and in-store promotions.

Customer Analytics suggests category growth can be accelerated through targeted customer, product and merchandising strategies.

TRIAL STORE ASSESSMENT OVERVIEW

Store trial delivered measurable improvements in sales and customer acquisition

To evaluate the effectiveness of the new store layouts, three trial stores (77, 86, and 88) were compared against statistically similar control stores. Results indicate that the trial layouts generated positive performance outcomes across sales, customer numbers and purchasing behaviour.

TRIAL VS CONTROL SUMMARY

Trial Store 	Control store 	Sales Uplift 	Customer Growth	Transaction per Customer 	Overall Assessment
77 	233 	 Significant	 Significant	 Significant	 Successful
86 	155 	 Significant	 Significant	 Significant	 Successful
88 	237 	 Significant	 Significant	 Significant	 Successful

**WHAT THIS MEANS**

The new store layout consistently improved sales and customer outcomes across all three trial stores, confirming the effectiveness of the intervention.

>>

**BUSINESS IMPACT**

The trial layout delivered measurable uplift across key performance metrics, demonstrating strong potential for broader rollout.

KEY FINDINGS

**Control Store Selection**

Stores were matched using:

- Total Sales Revenue
- Number of Customers
- Transactions per Customer

**Statistical Assessment**

Performance was evaluated by comparing:

- Actual trial Performance
- Expected Performance
- 95% Confidence Intervals

**Trial Period**

February 2019 - April 2019

TOP PREMIUM BRANDS PREFERRED

77

Store 77

Strong sales and customer growth. Higher purchasing frequency.

86

Store 86

Customer acquisition was the primary driver of performance. Transaction frequency unchanged.

88

Store 88

Growth observed in both customer numbers and purchasing frequency, driving strong sales uplift.

TRIAL STORE PERFORMANCE RESULTS

Trial stores consistently exceeded expected sales performance during the trial period

Across all three stores, sales performance exceeded the expected baseline established using matched control stores. The strongest uplifts were observed during March and April 2019, indicating that the new layout had a measurable positive impact on customer purchasing behaviour.

KEY FINDINGS

77

Store 77

Delivered the strongest overall uplift and exceeded expected sales by more than 60% in April.

86

Store 86

Generated significant growth through increased customer numbers rather than transaction frequency.

88

Store 88

Produced consistent positive uplift across both sales and customer metrics.

TRIAL PERFORMANCE SUMMARY						
Trial Store 	Control store 	Peak Sales Uplift 	Customer Growth 	Transaction per Customer	Key Driver 	Overall Outcome
77	233	+ 62.3% (April 2019)	 Significant	 Increased	Customers + Purchase Frequency	 Strong Success
86	155	+ 31.6% March 2019)	 Significant	No Change	Customer Acquisition	 Successful
88	237	+ 22.1% (March 2019)	 Significant	 Increased	Customers + Purchase Frequency	 Strong Success

BUSINESS IMPACT

The trial layout produced measurable and statistically significant sales improvements across multiple store formats, demonstrating strong potential for broader implementation.

RECOMMENDATIONS & NEXT STEPS

Roll out the new layout to similar stores while targeting high-value customer segments.

The analysis of customer behaviour and store trials confirms that a customer-centric approach combined with an optimised store layout drives measurable growth. The following recommendations will maximise the impact of the trial results and support sustainable category growth.

EXPAND THE TRIAL LAYOUT

Why?

- ✓ Trial stores 77 and 88 demonstrated statistically significant sales uplift.
- ✓ Store 86 showed strong customer growth.
- ✓ Positive results were observed across multiple locations.

Roll out the layout to stores with customer profiles similar to the trial stores.

PRIORITISE MAINSTREAM YOUNG SINGLES & COUPLES

Why?

- ✓ Largest customer segment within the chips category.
- ✓ Highest total category spend.
- ✓ Strong willingness to pay and brand engagement.

Position premium and popular brands prominently for this high-value segment.

FOCUS ON AFFINITY BRANDS

Key Affinity Brands

- Tyrrells
- Twisties
- Kettle
- Tostitos

- OLD
- Pringles
- Doritos
- Cobs

These brands show the highest affinity and contribute to premiumisation.

Use feature displays, end-caps and targeted promotions around these high-affinity brands.

LARGER PACK PREFERENCE

High Affinity Pack Sizes

270g

380g

330g

Place larger pack sizes at eye level and near promotional displays to drive visibility and sales.

EXPECTED BUSINESS IMPACT	
INITIATIVE	EXPECTED OUTCOME
Store Layout Rollout	Increased Sales Revenue through improved merchandising and customer experience.
Customer Segment Targeting	Higher Category Spend by focusing on the most valuable customer segment.
Brand Optimisation	Improved Basket Size driven by premium and high-affinity brand engagement.
Pack Size Strategy	Increased Unit Sales through greater visibility of larger, high-affinity pack sizes.

KEY SUCCESS FACTORS

Data-driven decisions grounded in customer insights and trial evidence.

Consistent execution of layout and merchandising standards.

Ongoing monitoring of sales, customers and purchase behaviour.

Agile optimisation to continuously improve performance.

The analysis indicates that targeted merchandising and store layout optimisation can drive meaningful growth in both sales and customer engagement, supporting the category strategy for the next six months.

Customer insights combined with store layout optimisation can drive measurable growth.

The trial results validate the effectiveness of the new layout, and the customer and product insights provide a clear roadmap for driving higher sales, stronger customer engagement and long-term category growth.

Increase Sales

Proven sales uplift across all trial stores.

Grow Customers

Higher customer numbers and engagement.

Optimise Assortment

Focus on high-affinity brands and preferred pack sizes.

Scale with Confidence

Roll out to similar stores with a proven framework.

THANK YOU
for your time and consideration.
